How We Can Help

Build Employer Partnerships

Foster relationships with local employers to align workforce needs with community college programs and to share open positions with career services and CTE staff.

Introdcue Open Positions

Introduce regional open positions by working **collaboratively** with LA19 career services staff, coordinate recruitment activities, and create new employer to employment and career centers staff connections through information sessions, recruitments events, and other targeted engagement opportunities.

Track Outcomes & Report Metrics

Help monitor key performance indicators (KPIs) shared available and future opportunities with LA19 Colleges, employer satisfaction, and industry trends to improve program effectiveness and outcomes.

Create Work-Based Learning Opportunities

Collaborate with employers to develop internships and other hands-on learning experiences for students.

Collaborate with Colleges & Regional Partners

Support communication and participation between the 19 LARC colleges and industry to strengthen cross-sector engagement and the education-to-employment pipeline.

Promote Awareness of CTE

Increase awareness of Career and Technical Education (CTE) programs through regional outreach events, job fairs, and employer engagement activities.
